

Ref.	Function	Value	Criteria	
FP1	Assist visually impaired users during navigation	4	FP1c1	Navigation guidance a
			FP1c2	Voice guidance qu
			FP1c3	User safety
FS1	Guide the user through voice assistance	4	FS1c1	Voice clarity
			FS1c2	Response time
FS2	Determine the user's location	4	FS2c1	GPS accuracy
			FS2c2	Position update freq
FS3	Analyze and describe the surroundings	4	FS3c1	Obstacle detecti
			FS3c2	Object recogniti
FS4	Access online navigation services	3	FS4c1	Internet availabil
			FS4c2	Map synchronizat
FC1	Operate on a compatible mobile device	3	FC1c1	Device compatibi
FC2	Ensure personal data protection	4	FC2c1	GDPR complian
			FC2c2	Data encryption
FC3	Comply with accessibility requirements	4	FC3c1	WCAG complian
			FC3c2	Screen reader comp

	Target Level	Flexibility	Limits
Accuracy	Safe and reliable navigation	F0	Depends on GPS and AI accuracy
Clarity	Clear real-time instructions	F1	Speaker or headphones required
	No critical navigation errors	F0	Limited by unexpected obstacles
	Easily understandable speech	F1	Ambient noise may reduce intelligibility
Response time	Less than 1 second	F1	Depends on smartphone performance
Range	≤ 5 meters	F0	Indoor environments may reduce accuracy
Frequency	Continuous updates	F1	GPS signal availability
Obstacle detection	Real-time detection	F1	Camera quality and lighting conditions
Image recognition	≥ 90% recognition accuracy	F2	Weather and image quality
Connectivity	Stable connection	F2	Limited functionality in offline mode
Automatic updates	Automatic updates	F2	Depends on network availability
Compatibility	Android and iOS supported	F1	Requires supported OS versions
Compliance	100% compliant	F0	Legal requirements must always be respected
Security	End-to-end encryption	F0	Secure storage required
Accessibility	WCAG 2.2 AA	F0	Must remain compliant after updates
Interoperability	Fully compatible	F0	Depends on the operating system
